PROFESSIONAL PROFILE

I have a thirst for knowledge and experience. My passions have varied over time, but my desire to learn is consistent. This allows me to effectively contribute when working with others, and provides me with continued motivation when working alone.

The combination of my strong technical theory and my appreciation for aesthetics has provided the foundation of my career path, fueling my desire to bridge the gap between functional technology and aesthetic design.

EDUCATION

School of Visual Arts Sept 2009 - Jan 2013
Bachelors of Fine Arts — 3.5 GPA
Graphic Design
New York, New York

Northeastern Univeristy Sept 2003 - May 2005
Creative Writing & Journalism
Boston, Massachusetts

School of Audio Engineering Nov 2006 - May 2007
Audio Engineering & Digital Production
New York, New York

PROFESSIONAL SKILLS

1. DEVELOPMENT

HTML & CSS (SCSS, LESS)
JavaScript (ES6, Babel, Webpack)
Preprocessors (Gulp, Grunt, PostCSS)
MVC Frameworks (React, Vue)
Responsive Design
Cross-Browser Best Practices
Version Control (Github, Terminal)

2. DESIGN

Adobe Photoshop
Adobe Illustrator
Sketch, InVision (Zeplin)

PROFESSIONAL OBJECTIVE

My immediate employment objective is to be a front-end web developer for an innovative company that embraces both cutting-edge technology and lasting aesthetics.

I would thrive as a member of a team that values communication and collaboration when working towards a common goal.

WORK EXPERIENCE

Rokkan February 2017 - Present
Senior Front End Developer, New York City
Took over as sole front end developer for an enterprise telecommunications client's OBD product. Rebuilt site from scratch to strip unnecessary dependencies (jQuery, Foundation), instead using ES6, Babel, Webpack, PostCSS. Worked with back-end development to convert static HTML to AEM components.

The Barbarian Group August 2014 - February 2017
Senior Front End Developer, New York City
Full-stack development on larger incremental projects, creating custom boilerplates for our team, major bug fixes, and building new global properties for an enterprise electronics retailer.

Global Point New York Sept 2013 - June 2014
Senior Fullstack Developer, New York City
Sole developer, fullstack web development for a small creative agency. Typical process included client interfacing, translating flat artwork into functional wireframes, full development, cross-browser testing, production setup and deployment.

Freelance Web Development Apr 2008 - July 2013
Various full-stack projects ranging from small- and medium-sized businesses to independent creatives. Includes custom Wordpress themes and plugins and static builds while studying design at the School of Visual Arts.
